

BACKEND API ROADMAP

GoMotar Car

Complete Backend API Documentation

A 15-day delivery plan covering every endpoint across the Customer App, Partner Apps (Cleaner, Supervisor, NCSP, Franchise), Operations Team App, and Admin Panel.

PREPARED FOR

Backend Development Team

SCOPE

7 Roles · 24 Modules · 180+ APIs

SECTION 01

What we are building

A multi-role mobility services platform connecting customers with car cleaners, A2Z service providers and franchisees — backed by an operations team and admin panel.

CUSTOMER FACING

Customer App

Subscribe to car cleaning · Search A2Z services · Book franchise services · Recharge FastTag · Track payments & invoices.

PARTNER APPS · EXTERNAL

Cleaner · NCSP · Franchise

Car Cleaner (CL), NCSP (NC), CSP Franchise (FR) and Steam Car Wash (FS). Role-based registration, approval, work and earning flows.

PARTNER APPS · INTERNAL

Supervisor · Ops · Admin

Supervisor (SU), Operations Team (OT), and Admin Panel for content, approvals, monitoring and reports.

Role Codes

- CL · Car Cleaner
- SU · Supervisor
- NC · NCSP
- FR · Franchise CSP
- FS · Steam Car Wash
- OT · Operations Team
- CU · Customer
- AD · Admin

SECTION 02

Recommended Tech Stack

Production-ready, scalable and AWS-friendly for the GoMotar Car deployment target.

Backend Runtime

Node.js 20+ · Express / NestJS
TypeScript · Zod validation
JWT auth · OTP via MSG91 / Twilio
BullMQ for queues & jobs

Database & Cache

PostgreSQL 15 (primary store)
Redis (cache, OTP, rate limits)
Elasticsearch (NCSP search)
S3 / CloudFront (media + QR PNGs)

Infrastructure

AWS EC2 / ECS · ALB · RDS · S3
CloudWatch logs · Sentry
FCM push (Android & iOS)
Razorpay / PayU for payments

API Conventions

REST · JSON · /api/v1/* base
Bearer JWT · X-Role header
Pagination: ?page & ?limit
Standard error envelope & codes

STANDARD RESPONSE ENVELOPE

```
{ "success": true, "data": {...}, "message": "OK", "meta": { "page": 1, "total": 25 } }
```

15-DAY DELIVERY PLAN

Week 1 • Foundation & Customer Core

Day 1

Project setup & database design

Repo, CI, env, Postgres schema for users, partners, vehicles, apartments, packages, bookings, payments. Migrations & seed.

Day 2

Auth, OTP, role-based JWT & common middleware

Send/verify OTP, register flows for all roles, JWT issue/refresh, role guard, audit log middleware, error handler.

Day 3

Customer profile, addresses, cars • RC / PUC / Challan integrations

Profile CRUD, address book, car management with RC verification API, PUC validity check, RTO challan fetch.

Day
4

Subscribe module • Hire Car Cleaner

Packages, book-demo, subscribe, cleaning balance, renewals, history. Cleaner/supervisor change request handler.

Day 5

Search module • NCSP listing + Elasticsearch

Categories, search bar, geo range (10/15/25 km expand), provider details, contact & rate APIs.

15-DAY DELIVERY PLAN

Week 2 • Bookings, Partners & Field Operations

Day 6

Booking module • Franchise CSP & Steam Car Wash

Service catalog, slots, At-Works / Door-Step modes, payment options, order management, tracking, invoicing.

Day 7

FastTag recharge • Payments gateway • Invoicing

Third-party FastTag API, balance fetch, recharge records. Razorpay integration, wallet, on-demand tax invoice.

Day 8

Car Cleaner App • Work, QR scan, Earnings

Daily schedule, QR scan with geo-fencing, start/end work, offline buffer, earnings (daily/weekly/monthly), tips.

Day 9

Supervisor App • Onboarding, QR validation, allocation

New customer onboarding flow, QR validation/reassignment, cleaner allocation, work approval/reject/redo.

Day
10

NCSP App • Registration, services, leads, promo offers

GST API on register, service add/delete, pricing matrix, lead summary, cost-per-lead, promotional offers.

15-DAY DELIVERY PLAN

Week 3 • Internal Tools, Admin & Hardening

Day
11

Franchise App • Bookings, Job Card, Wallet, Ratings
Accept/reject/hold, job card modification, customer approval, warranty, order history, wallet, work timings.

Day
12

Operations Team App • Onboarding & grievance handling
Onboard Franchise/NCSP/Supervisor/Cleaner, expedite bookings, grievance resolve/escalate, franchise ratings.

Day
13

Admin Panel • Content, Approvals, Reports, QR generation
CMS for banners & policies, partner approvals, monitoring dashboards, report exports, QR batch generator script.

Day
14

Notifications, Grievances, Ratings — cross-cutting
FCM push fan-out, in-app feed, grievance threads with resolution & escalation, ratings rollups.

Day

QA, security audit, load test, deploy to AWS
Post deployment - OWASP, security audit, DB load, CS load, load testing in CI/CD pipeline

COMMON MODULE • ALL ROLES

Authentication • OTP • Registration

Single OTP flow for all 7 roles. JWT with role claim drives all guards.

POST	/api/v1/auth/send-otp	Body: { mobile, role } • Sends 6-digit OTP via SMS, stored in Redis (5 min TTL). Returns requestId.
POST	/api/v1/auth/verify-otp	Body: { requestId, otp, fcmToken } • On success returns accessToken, refreshToken, user/registration status.
POST	/api/v1/auth/register/customer	Body: { name, email, mobile, refCode } • Creates customer profile and activates immediately.
POST	/api/v1/auth/register/partner	Body: role-specific form data (CL / NC / FR / FS) • Creates registration record in PENDING_APPROVAL; returns regId.
GET	/api/v1/auth/registration/:regId	Poll status — PENDING / PAYMENT_REQUIRED / ACTIVE / REJECTED. Drives the "Approval pending" splash on Partner App.
POST	/api/v1/auth/refresh-token	Body: { refreshToken } • Rotates access token (15 min) and refresh token (30 days).
GET	/api/v1/auth/me	Returns current authenticated user (role, partnerId, permissions, profile snapshot).
POST	/api/v1/auth/logout	Invalidates refresh token and FCM token. Enforces single-sign-in for Cleaner role.
POST	/api/v1/auth/internal/login	Internal users (Supervisor / Ops / Admin) sign in with credentials created from Admin Panel.

CUSTOMER APP · MODULE 01

Subscribe · Hire Car Cleaner

Book demo, subscribe to a package, track cleaning balance and renewal.

GET	/api/v1/customer/packages	List subscription packages — general & apartment-wise. Cost, duration, internal/external cleaning counts.
POST	/api/v1/customer/subscription/book-demo	Free demo booking — same flow as paid subscribe, no payment. Allocates a temporary QR.
POST	/api/v1/customer/subscription/subscribe	Body: { packageId, carId, addressId, startDate, paymentToken } · Creates subscription, triggers payment & QR allocation post-payment.
GET	/api/v1/customer/subscription	Returns active subscription, assigned cleaner & supervisor, QR id, package details.
GET	/api/v1/customer/subscription/balance	Cleaning balance — package vs actual work (internal/external), carry-forward, adjustment notes.
POST	/api/v1/customer/subscription/renew	Renew current package; carries cleaning balance forward and reuses existing QR.
GET	/api/v1/customer/subscription/history	Per-day cleaning records (date, type, cleaner, status, photo evidence if any).
POST	/api/v1/customer/cleanings/:id/reject	Customer rejects a cleaning record; routes to Supervisor for redo / final action.
POST	/api/v1/customer/subscription/change-staff	Request change of cleaner / supervisor. Backend handles transition, balance carry-forward, QR re-binding.

CUSTOMER APP · MODULE 02

Search · NCSP A2Z Services

Elasticsearch-backed listing with geo range expansion (10 → 15 → 25 km).

GET	/api/v1/customer/search/categories	Returns main & sub-categories with icons for the search homepage.
GET	/api/v1/customer/search/services	Query: q, lat, lng, range, locationType · Returns matching services with correlated tags (elastic search).
GET	/api/v1/customer/search/providers	Query: serviceId, lat, lng, range · NCSP list sorted by distance with logo, business name, contact.
GET	/api/v1/customer/search/providers/:id	Provider details — business info, services, contact person, WhatsApp link, distance, ratings.
POST	/api/v1/customer/search/contact	Body: { providerId, channel: 'CALL' 'WHATSAPP' } · Logs lead for NCSP cost-per-lead metric.
POST	/api/v1/customer/search/providers/:id/rate	Body: { rating, comment } · Star rating + optional review for NCSP rollup.
GET	/api/v1/customer/search/electric-vehicles	Curated EV-specific service providers (App Drawer item).
GET	/api/v1/customer/search/sos	SOS / roadside assistance providers near current location.

CUSTOMER APP • MODULE 03

Booking • Franchise CSP & Steam Wash

At-Works or Door-Step modes, pick-up & drop, slot calendar, payment, tracking.

GET	/api/v1/customer/booking/services	CSP catalog (Periodic, Wheel, AC, Battery, Detailing) and Steam Wash by pin code.
GET	/api/v1/customer/booking/franchises	Query: <code>serviceId, lat, lng pin</code> • Returns eligible franchises with price & ratings.
GET	/api/v1/customer/booking/slots	Query: <code>franchiseId, date</code> • Available time slots respecting franchise weekly off / working hours.
POST	/api/v1/customer/booking	Body: { <code>franchiseId, serviceId, carId, mode, pickup, slotId, paymentType</code> } • Creates booking, awaits franchise acceptance.
GET	/api/v1/customer/booking/:id	Booking details with current stage, job card, hand-over status, ETA.
POST	/api/v1/customer/booking/:id/cancel	Conditional cancel (rules: window before slot, payment mode). Returns refund status.
POST	/api/v1/customer/booking/:id/jobcard/approve	Approve add-on work proposed by franchise (with revised price).
POST	/api/v1/customer/booking/:id/pay	Capture payment (online) or mark cash collected. Posts ledger entry for franchise wallet.
GET	/api/v1/customer/booking/:id/invoice	On-demand tax invoice PDF with cost/tax break-up, GSTIN, warranty notes.
POST	/api/v1/customer/booking/:id/rate	Rate franchise + service after completion (1–5 stars, feedback).

CUSTOMER APP · MODULES 04-05

FastTag · Profile · Cars · Offers

Third-party FastTag, RC verification, address book, value-for-money offers.

GET	/api/v1/customer/fasttag/balance	Query: vehicleNo · Pre-recharge balance from third-party API.
POST	/api/v1/customer/fasttag/recharge	Body: { vehicleNo, amount, paymentToken } · Initiates third-party recharge; stores record with status.
GET	/api/v1/customer/fasttag/history	Recharge log: vehicle, amount, status, date/time, post-recharge balance.
GET	/api/v1/customer/profile	Profile info, addresses, cars, settings.
PUT	/api/v1/customer/profile	Edit name, email, picture.
POST	/api/v1/customer/addresses	Add Home / Work / Other address. PUT/DELETE /:id for edit / delete.
POST	/api/v1/customer/cars	Add car (manual or via RC API). Body: { vehicleNo, model, fuelType }.
POST	/api/v1/customer/cars/:id/verify-rc	Hits RC verification third-party; fills owner, model, registration, fitness.
GET	/api/v1/customer/cars/:id/puc	PUC validity check (post data validation).
GET	/api/v1/customer/cars/:id/challan	RTO challan status fetched from third-party API.

CAR CLEANER APP · ROLE CL

Home · Schedule · QR Work Flow

Part-time 15 cars / Full-time 30 cars · single sign-in · geo-fenced scanning.

GET	/api/v1/cleaner/home	Name, location, apartments/cars/supervisors counts, today work summary (assigned, done, % done, start/end times).
GET	/api/v1/cleaner/apartments	Allocated apartments with details (name, address, car count).
GET	/api/v1/cleaner/work/schedule	Query: date · Daily schedule grouped by apartment with cars, customers, cleaning type.
POST	/api/v1/cleaner/work/scan	Body: { qrCode, lat, lng, type: 'INTERNAL' 'EXTERNAL' } · Validates QR + geo-fence, opens work session.
POST	/api/v1/cleaner/work/:sessionId/start	Marks work start time. Enforces minimum lock duration (WIP) before end allowed.
POST	/api/v1/cleaner/work/:sessionId/end	Body: { photoUrl, notes } · Completes session, posts to supervisor approval queue.
POST	/api/v1/cleaner/work/offline-sync	Body: array of buffered sessions captured offline. Server reconciles, returns accepted/rejected lists.
GET	/api/v1/cleaner/work/approval-status	List of sessions with status: APPROVED / REDO / REJECTED_BY_CUSTOMER / REJECTED_BY_SUPERVISOR.
GET	/api/v1/cleaner/work/assigned-vs-completed	Query: period · Counts for day/week/month with completion percent.
GET	/api/v1/cleaner/ratings	Daily & monthly performance ratings from customers.

CAR CLEANER APP • EARNINGS & PROFILE

Earnings • Inventory • Profile • Grievances

Salary calc on internal/external work, tips, inventory accept/reject, grievance threads.

GET	/api/v1/cleaner/earnings	Query: period=daily weekly monthly • No. of cleanings (internal/external) and total amount.
GET	/api/v1/cleaner/earnings/balance	Earning vs payment received — weekly & monthly balance.
GET	/api/v1/cleaner/payments	Salary & tips history with date, duration, customer, amount.
GET	/api/v1/cleaner/inventory	Items allocated by supervisor with qty & date.
POST	/api/v1/cleaner/inventory/:id/accept	Confirm receipt of allocation. POST /:id/reject raises dispute.
GET	/api/v1/cleaner/cautions	Warnings / cautions issued for work-related issues.
GET	/api/v1/cleaner/profile	Name, picture, role, partner id, address, service apartments, bank/UPI, insurance details.
PUT	/api/v1/cleaner/profile/payment-details	Update bank account / UPI / insurance details.
POST	/api/v1/cleaner/grievances	Raise issue with type & supporting photos. GET /api/v1/cleaner/grievances for list + resolution thread.
POST	/api/v1/cleaner/apartments/request	Request addition of new apartment for service coverage. Goes to Supervisor / Admin.

SUPERVISOR APP · ROLE SU

Customer Onboarding · QR Validation · Cleaners

Apartment-wise allocation, QR scan/reassign, cleaner add & work approval.

GET	/api/v1/supervisor/home	Apartments / customers / cars / cleaners counts, daily work assigned vs done with completion bar.
GET	/api/v1/supervisor/onboarding/queue	New subscribed customers pending QR onboarding, grouped by apartment.
POST	/api/v1/supervisor/onboarding/qr-scan	Body: { subscriptionId, qrCode qrIdentificationNo, vehicleNo, photoUrl } · Validates QR uniqueness, binds to car.
POST	/api/v1/supervisor/onboarding/qr-reassign	Replace damaged/lost QR. Body: { subscriptionId, newQrCode, reason }.
GET	/api/v1/supervisor/onboarding/list	Onboarding history per apartment with car no, customer name, contact, QR details, status.
POST	/api/v1/supervisor/cleaners	Add cleaner under this supervisor. Body: { name, mobile, type: 'PART_TIME' 'FULL_TIME' }.
GET	/api/v1/supervisor/cleaners	All allocated cleaners with capacity (15/30), live load, incentives, insurance.
POST	/api/v1/supervisor/subscriptions/:id/assign-cleaner	Allocate cleaner to a new subscription (capacity alerts trigger at 10/25).

SUPERVISOR APP • WORK & INVENTORY

Work Approvals • Rejections • Inventory • QR Stock

Approve / reject / redo cleaner work, handle customer rejections, manage inventory and QR.

GET	/api/v1/supervisor/work/schedule	Apartment-wise daily schedule, assigned vs done as per cleaner records.
GET	/api/v1/supervisor/work/approval-queue	Completed cleaner sessions awaiting approval.
POST	/api/v1/supervisor/work/:sessionId/approve	Approve session → counts toward cleaner payout.
POST	/api/v1/supervisor/work/:sessionId/redo	Mark for redo; sends notification to cleaner with reason.
POST	/api/v1/supervisor/work/:sessionId/reject	Reject and exclude from payout. Logs caution against cleaner.
GET	/api/v1/supervisor/customer-rejections	List of cleanings rejected by customer with details & follow-up state.
POST	/api/v1/supervisor/customer-rejections/:id/action	Body: { action: 'ACCEPT' 'REDO' 'FOLLOW_UP', remark }.
GET	/api/v1/supervisor/qr-stock	QR codes issued / used / balance.
POST	/api/v1/supervisor/qr-stock/request	Request new QR batch from Operations / Admin.
GET	/api/v1/supervisor/inventory	Received / accepted / allocated / balance. POST /allocate to push to cleaner.

NCSP APP • ROLE NC

Registration • Services • Pricing

GST-verified onboarding, multi-service add, pricing matrix per vehicle type.

POST	/api/v1/ncsp/register	Body: { business, gstin, address, contact, services[] } · GST verification + annual fee payment hook.
POST	/api/v1/ncsp/verify-gst	Server-side GST API call — returns trade name, address, status. Required to proceed.
POST	/api/v1/ncsp/payment/annual-fee	Pay annual registration fee. Activates listing on customer search.
GET	/api/v1/ncsp/services/catalog	Master list of available service categories & sub-services.
POST	/api/v1/ncsp/services	Add chosen services with description & range. DELETE /:id to remove.
POST	/api/v1/ncsp/services/suggest	Suggest a new service not in catalog; routed to Operations / Admin for approval.
PUT	/api/v1/ncsp/pricing	Body: matrix of <code>serviceId</code> × <code>vehicleType</code> → <code>price</code> . Used by search results.
GET	/api/v1/ncsp/profile	Business profile, photos, working hours, banking. PUT to update.
PUT	/api/v1/ncsp/profile/timings	Working hours and weekly off; affects "available now" badge on customer search.

NCSP APP • LEADS & PROMOTIONS

Leads • Cost-Per-Lead • Promotional Offers

Track customer contacts as leads, surface analytics, publish offers.

GET	/api/v1/ncsp/leads	Current leads with customer name, contact, vehicle, service interest, channel, date.
GET	/api/v1/ncsp/leads/:id	Single lead detail. Includes status: NEW / CONTACTED / CONVERTED / LOST.
PATCH	/api/v1/ncsp/leads/:id/status	Body: { status, notes } • Internal CRM update.
GET	/api/v1/ncsp/leads/summary	Query: period=weekly monthly annual • Aggregates.
GET	/api/v1/ncsp/leads/cost-per-lead	Annual fee + recurring spend ÷ confirmed leads → CPL ROI.
POST	/api/v1/ncsp/offers	Body: { title, description, banner, validFrom, validTo, discount } • Goes to Value-for-Money feed.
GET	/api/v1/ncsp/offers	List of own promotional offers with interest counts.
POST	/api/v1/ncsp/payment/renew	Renew annual package; sends invoice; extends listing validity.
GET	/api/v1/ncsp/ratings	Customer ratings & reviews aggregated for the listing.

FRANCHISE APP • CSP (FR) & STEAM WASH (FS)

Bookings • Job Card • Wallet • Promotions

Single API surface for both franchise types; type discriminator on registration.

POST	/api/v1/franchise/register	Body: { type: 'CSP' 'STEAM', business, gstin, services[], serviceArea } • Pays setup fee.
POST	/api/v1/franchise/services	Add services from catalog. DELETE /:id to remove.
PUT	/api/v1/franchise/pricing	Service × vehicle-type pricing matrix.
GET	/api/v1/franchise/bookings	Booking alerts (new), in-progress, completed; filters by date/service/status.
POST	/api/v1/franchise/bookings/:id/respond	Body: { action: 'ACCEPT' 'REJECT' 'HOLD', reason?, holdTill? }.
POST	/api/v1/franchise/bookings/:id/jobcard	Modify job card — add line items, parts & labour, revised quote. Triggers customer approval.
POST	/api/v1/franchise/bookings/:id/jobcard/warranty	Add warranty notes & validity per item; appears on invoice.
POST	/api/v1/franchise/bookings/:id/close	Close booking after payment + hand-over. Triggers invoice & rating prompt.
GET	/api/v1/franchise/order-summary	Query: period=daily monthly annual • Orders, revenue, cancellations.
GET	/api/v1/franchise/wallet	Payments received, commissions, payouts & ledger entries.

OPERATIONS TEAM APP · ROLE OT

Onboarding · Bookings · Grievance Handling

Field ops control plane — onboards partners, expedites bookings, resolves disputes.

GET	/api/v1/ops/team/summary	All onboarded partners (Franchise / CSP / NCSP / Supervisor / Cleaner) with active/inactive counts.
POST	/api/v1/ops/onboarding/franchise	Onboard CSP / Steam franchise on behalf of partner; collects KYC/GST docs.
POST	/api/v1/ops/onboarding/ncsp	Onboard NCSP partner manually with GST verification.
POST	/api/v1/ops/onboarding/supervisor	Add supervisor with allocated apartments.
GET	/api/v1/ops/bookings	Query: status, franchiseId, date · Active & historical booking visibility.
POST	/api/v1/ops/bookings/:id/expedite	Manual escalation — notifies franchise & flags admin dashboard.
GET	/api/v1/ops/grievances	Query: source=customer franchise cleaner · Unified grievance feed.
POST	/api/v1/ops/grievances/:id/resolve	Body: { resolution, refundAmount? } · Closes ticket.
POST	/api/v1/ops/grievances/:id/escalate	Escalate to Admin tier with reason & SLA timer.
POST	/api/v1/ops/franchise/:id/rate	Internal franchise quality rating (visible only to ops/admin).

CMS · Approvals · Reports · Monitoring · QR

Web dashboard backend — full read/write authority across the platform.

GET	/api/v1/admin/dashboard	Live KPIs — subscriptions, bookings, revenue, grievance SLA, active partners.
GET	/api/v1/admin/users	Query: <code>role, status, search, page, limit</code> · All users with filters.
POST	/api/v1/admin/users/:id/status	Body: { <code>status: 'ACTIVE' 'INACTIVE' 'BLOCKED', reason</code> }.
GET	/api/v1/admin/approvals/pending	Partner registrations, NCSP service suggestions, refund requests.
POST	/api/v1/admin/approvals/:id	Body: { <code>action: 'APPROVE' 'REJECT', notes</code> } · Generic approval handler.
POST	/api/v1/admin/internal-users	Create Supervisor / Ops / sub-admin with role + permission scopes.
POST	/api/v1/admin/content/banners	CMS for banners on Home, Subscribe, Booking. PUT <code>/policies</code> for T&C, Privacy, Help.
POST	/api/v1/admin/qr-codes/batch	Body: { <code>count, prefix, supervisorId?</code> } · Generates batch, produces printable PDF on S3.
GET	/api/v1/admin/reports/:type	Types: <code>subscriptions, bookings, revenue, payouts, grievances</code> · Exports CSV/XLSX.
GET	/api/v1/admin/website/queries	Contact / lead form submissions from the marketing website. POST <code>/:id/respond</code> to reply.

CROSS-CUTTING • ALL ROLES

Notifications • Grievances • Ratings • QR

Shared endpoints used by every app, scoped by JWT role.

GET	/api/v1/notifications	In-app notification feed for the authenticated user. Paginated.
PATCH	/api/v1/notifications/:id/read	Mark single notification as read. PATCH /read-all for bulk.
POST	/api/v1/notifications/fcm-token	Register / refresh FCM device token for push delivery.
POST	/api/v1/grievances	Body: { type, subject, description, photos[], refId? } • Returns ticket id.
GET	/api/v1/grievances/:id	Ticket detail with resolution thread (messages, attachments, status timeline).
POST	/api/v1/grievances/:id/message	Append message to resolution thread (customer ↔ ops).
GET	/api/v1/ratings/:entityType/:id	Aggregated rating for entity (cleaner / franchise / NCSP) with histogram & recent reviews.
GET	/api/v1/qr/:code/validate	Used by Supervisor & Cleaner — validates QR id, returns binding (customer, car, subscription).
GET	/api/v1/master/apartments	Apartment master (id, name, society, polygon for geo-fence).
GET	/api/v1/master/vehicle-types	Vehicle types & fuel categories used in pricing matrices.

THIRD-PARTY INTEGRATIONS

External APIs the Platform Depends On

All wired through a single `integrations/` module with retry + fallback.

SMS & OTP

MSG91 / Twilio — transactional OTP, FCM-fallback delivery, DLT templates.

Payment Gateway

Razorpay (primary) / PayU — order, capture, refund webhooks, UPI & cards.

RC / PUC / Challan

Surepass / Signzy — vehicle registration, PUC validity, RTO challan look-up.

FastTag

NPCI-authorised aggregator for balance fetch & recharge by vehicle number.

GST Verification

GSTIN lookup for NCSP & Franchise onboarding — trade name, status, address.

Maps & Geo

Google Maps — geocoding, place autocomplete, distance matrix for search range.

Push & Email

FCM (Android/iOS push) · AWS SES for invoices & partner statements.

Storage & CDN

AWS S3 (originals) + CloudFront (CDN) for photos, QR PDFs, invoices.

POSTGRES SCHEMA OVERVIEW

Core Tables & Relationships

Normalized schema; partner table polymorphism by role; soft-delete via deleted_at.

Identity users user_roles sessions fcm_tokens otp_requests	Customer customers addresses cars car_documents offers_interest	Subscription packages subscriptions qr_codes cleaning_sessions cleaning_balances
Partners partners partner_kyc partner_services pricing_matrix partner_timings	Bookings bookings booking_items job_cards warranties booking_events	Money payments refunds invoices wallet_ledger payouts
Ops apartments supervisor_allocations cleaner_allocations inventory_items inventory_allocations	Engagement leads promotional_offers ratings notifications grievances	Admin / CMS banners policies approvals website_queries audit_logs

DAY 15 HAND-OFF

Deliverables & Hand-off

What the backend team ships at the end of the 15-day cycle, ready for app integration.

API Surface

180+ REST endpoints across 7 roles · Postman collection · OpenAPI 3.1 spec.

Database

Postgres schema · migrations · seed data · ERD diagram in repo.

Infrastructure

AWS staging + production · Terraform · CI/CD pipeline · CloudWatch alerts.

QA & Security

OWASP scan · rate-limits · JWT rotation · load test (500 RPS) · backups.

STATUS

Ready for Mobile & Web Integration
